

If you are convinced that innovation is the key to improving patients' lives

Then you're one of us.

Innovative medicines for people and animals have for more than 130 years been what the research-driven pharmaceutical company Boehringer Ingelheim stands for. Boehringer Ingelheim is one of the pharmaceutical industry's top 20 companies and to this day remains family-owned. Day by day, some 50,000 employees create value through innovation for the three business areas human pharmaceuticals, animal health and biopharmaceutical contract manufacturing. In 2016, Boehringer Ingelheim achieved net sales of around 15.9 billion euros. With more than three billion euros, R&D expenditure corresponds to 19.6 per cent of net sales.

## Senior Manager (m/w) Regulatory Affairs – Impfstoffe – 1712935

Are you interested in working proactively in international regulatory affairs with a focus on veterinary vaccines? If so, we can offer the opportunity to use and advance your professional skills in a demanding field of work.

### Tasks & responsibilities

- In this role you have the responsibility for the preparation and submission of pre- and post-approval documentation for veterinary vaccines in Europe – with a major focus on safety and efficacy section of the dossier, incl. detailed and critical summaries.
- You prepare and co-ordinate the response to questions from OPU/authorities and ensure consistency.
- As an expert you will participate in international project teams as European Core or S&E Subteam Member for regulatory affairs and provide regulatory assessment according to current legislation and requirements.
- You develop and realize regulatory strategies for new and authorized veterinary vaccines.
- Also you liaise with EU competent authorities /R&D vaccine/ external experts.
- You know about the importance of communication, therefore you are responsible to maintain contact between and within OPU /licensees to assist with pre-and post-approval regulatory issues.

### Requirements

- Degree in Life Science (Veterinarian with Ph. D. or comparable background, preferably in the field of Microbiology)
- Experience of at least 5 years in International Regulatory Affairs with excellent knowledge of current legislation
- Established understanding of the development of veterinary vaccines
- Thoroughness, commitment, attention to details and persistence
- Ability to work in firm deadlines and in an independent result-oriented manner as well as to work in teams
- Good communication, negotiation and organizational skills
- Excellent written and spoken English
